Proposed Model
## Final Classifier

- Concatenate all vectors (claim, article, subreddit, comments)

Experiments
Datasets

Labeled by	Articles	Claims	Reddit comments	False claims
Snopes	36,271	3,096	352,708	73%
Politifact	11,019	9,453	289,424	80%
Emergent	250	48	20,073	36%
Total	47,540	12,597	662,205	63 %

- Reddit comments for fact checked fake/true news

  - https://www.kaggle.com/deepnews/fakenews-reddit-comments

- Rumor data

  - Claims labeled by snopes.com, politifact.com, emergent.com

- Reddit data

  - Use Reddit API to get user comments.

  - Omit the subtree of comments which appear after the debunking comments referencing fact-checking websites.
